<b>Office Action Summary</b>	<b>Application No.</b> 10/849,013	<b>Applicant(s)</b> ISHIGAMI ET AL.	
	<b>Examiner</b> Noah Kamen	<b>Art Unit</b> 3747	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 20 May 2004.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.

**DETAILED ACTION*****Drawings***

Figures 11 and 12 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4, 10, 11, and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by "Prior Art", as shown in figure 11 as disclosed in the present disclosure.

The pillar mounted on a tower is so broad as to read on pillar 2 which may be arbitrarily divided into an upper section (pillar) and a lower section (tower). Furthermore, the mere volume of the "tower" would inherently function as an expansion chamber. There is also an expansion silencer 5 and an air cleaner 7. The air cleaner is deemed to be above the silencer as evidenced by the upturned duct 6.

***Claim Rejections - 35 USC § 103***

Art Unit: 3747

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3 and 5-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over "Prior Art" (fig. 11) as applied to claim 1 above, and further in view of Houle et al (5424494).

Houle et al show an expansion silencer at 14, a resonance chamber 24, and a rib at 12 and near 22. The silencer is made of plastic (resin). The silencer is easy to manufacture and effectively reduces noise; therefore, it would have been obvious to one of ordinary skill in the art to use the silencer of Houle et al in "Prior Art".

#### ***Allowable Subject Matter***

Claims 8, 9, 17, and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The remaining cited references show expansion silencers in combination with resonance silencers..
